

Move Ahead!

Whether you are online or not is not a choice any longer. Your customers are looking online for businesses that suit their needs. Those customers look at websites, reviews, social media, and even maps that mark your spot. They want to feel safe with your business!

So, the question is do you have a website that customers can find and use?

I am offering websites for businesses. You only pay for the incidentals such as domain name registration, SSL (secured socket layers) certificates, and hosting. Does that seem fair to you?

Why do I offer to help businesses for so little? Because it builds the community and offers me an opportunity to do business with you for other projects. Win-Win & easy decision, right!

Give us three things.

1. A description of your business
2. Pictures
3. Contact information

With this offer you must pay for the necessary fee's like the registration of your domain name, the hosting (\$25/month) and specialty software such as SSL Certificates (when needed.)

“YOUR CUSTOMERS CAN'T
FIND YOU IF YOU DON'T
EXIST AND YOU DON'T EXIST
IF THEY CAN'T FIND YOU
ONLINE!”

WHAT I WILL DO

I will place your information online so you can be discovered by the local community. You need to provide the basic brochure information that your customers need to know. Location, hours, what you do, and how to contact you.

Next, I will format your images for the Internet. Careful placement of those pictures will be included in your content delivery system, a fancy word for a web page that is served to visitors.

Finally, I will provide you with a finished draft and then get it online and registered with the search engines.

WHO I AM!

I am Jeff Watters and have been programming Internet resources since 1994 for business people. My customers have sold their products all over the world, including houses, fitness equipment, and medical devices.

I believe programming has become too expensive for most start-ups. So I am going to help you get going at a minimal cost.

My experience includes Internet programming, writing for newspapers, television show host, and marketing.

I can be reached at 443-252-6170 for a free consultation during normal business hours.

GET MORE CUSTOMERS

Having a website is crucial to success in business. Most businesses have one or two sites that promote their products or services. That can be expensive. So, I had an idea. What if I took my talent and helped my community by giving low cost websites to businesses?

Your customers need information that they cannot get without your participation. They need to know what you do, where you are, and when you are open. Simple enough but Google won't serve up your website if it is not there or not coded correctly.

Order now! All I ask if that you pay the incidentals such as the hosting cost, and fees for registration. It isn't expensive and is deductible at tax time.
